

## About this project

Billing Validation and Analytic Tool (BVAT) 2.0 is an enhanced billing system designed to streamline, standardise and automate billing processes across all products and services

## Key Features

### Standardized inputs

Reduces human errors

### Enhanced process

Simplified customer  
ID process

### API integration

Eliminates manual data transfer

## Project Goals

Enhance operational efficiency by automating processes, reducing errors, and minimizing reliance on manual efforts ensuring greater accuracy, consistency and productivity

### Before BVAT 2.0

~4,600 mandays per year to  
bill and manage receivables  
for 39 products

### With BVAT 2.0

~2,800 mandays per year to  
bill and manage receivables  
for 39 products

Savings of ~1,800  
mandays per year
